EXPERIENCE

Cognizant| Sr Salesforce Developer (LWC / Salesforce CORE) Sept' 21- Present

- **Airliquide Inc. (UK)** : This project deals with care monitoring / providing respiratory equipment's to patients / managing field agents, territories, appointments and vehicles / orders for deliveries. The Project is distributed across business regions such as APAC, EMEA, FRANCE, CORE, ITALY etc. Customized Flows, LWC, Apex, Field Service Lightning (FSL), and the Salesforce Mobile App to optimize field operations. Managed Country specific metadata with Git repository.
- **HUMANA Inc. (USA)** : Designed and implemented a comprehensive insurance management system within Salesforce Health Cloud, enabling CRM representatives to handle user enrolments for medical policies, manage healthcare data, and address inquiries through a custom call center application built with Lightning Web Components (LWC) and integrated with multiple systems.

IQVIA | Sr Salesforce Developer (LWC) Jan' 20- Aug' 21

- **Study Hub (USA)** : Developed a healthcare application focused on Vaccine Management and Clinical Trials, managing patient life stages and vaccination schedules. As an LWC Developer, built custom web components for the community while contributing to Apex class development, test execution, requirement analysis, and HealthCloud customization. Additionally, handled production code fixes to ensure system reliability and performance

Accenture | Salesforce Developer Feb' 18- Dec' 19

- **AutoDesk Inc:** Contributed as a Salesforce Developer for Autodesk Inc., one of the largest PL firms, focusing on the Campaign Management (CM) module. This project enabled Marketing and Sales Representatives to create and manage campaigns across various markets and geographies. Developed features for both Partner and User portals, ensuring role-based access and functionality tailored to different user rights
- **Vodafone UK:** Worked as a Salesforce Developer for Vodafone, enhancing product supply processes across various commercial markets managed by regional and global product managers. Developed and implemented custom solutions in Salesforce to support product management workflows. Created and refined UX templates, collaborating with developers to integrate them into the system

PERSONAL PROJECT

- **Generic Travel Booking (LWC / LMS):** Designed and developed a generic booking platform using Lightning Web Components (LWC) / LMS for managing bookings of buses, trains, and ships. Built functionality to add and manage object-specific details such as timings, routes, and availability. Implemented dynamic date and route selection. Integrated Google Maps API to display live location tracking and enhanced user experience with route visualization.

ACHIEVEMENTS

- Wrote a book – [The Product Tactics: Unfold your customer](#) – The book describes about how big techies are making money by using customers psychology. It focuses on how to make habit forming product.
- Recognition in Lightning component – Cognizant
- Employee of the month – Accenture
